Single-Order vs Repeat Customers

Single Order Customers and Repeat Customers

Repeat customers placed 2+ orders within the selected period. Single-order customers placed exactly 1 order.

Sales include positive-price purchases with a known Customer ID. Cancellations and returns are excluded, so sales are before returns. Currency: GBP (£).

Customer Cohort Retention

Rows group customers by their first purchase month recorded in this dataset. Columns show months since that purchase. Each percentage is the share purchasing in that month. Only complete months through November 2011 are included.
